

# Cellular Therapy Tehnical Brief: Materials & Adhesives

All Digi-Trax Cellular Therapy labels are manufactured from white polypropylene with permanent acrylic adhesive that can be applied at 35°F (1.67°C). These labels will remain serviceable under cold storage conditions, including freezer storage (-80°C), vapor phase nitrogen (-190°C), and liquid nitrogen (-196°C).

Our adhesive meets FDA CFR 21, Sec. 175.105 and our HemaTrax®-CT label kits come with a matched full resin ribbon. You can be certain that the image will remain legible and all 1-D or 2-D bar codes are scannable when exposed to the rigorous conditions found in Cellular Therapy applications and storage.

### Cellular Therapy Full Collection Label 4" x 4"

Product Number: CT-44-G  
600 labels per roll, 4 rolls per case, 2400 labels total, 4 ribbons.
