Time plus CMV testing

Combination (4" x 2")  
for all Product Codes  
with corresponding  
Expiration Dates  
& Time.

# HemaTrax<sup>®</sup> Facts

## Your Choice

Standalone

Depending upon your work process, HemaTrax is available as an **integrated** product (configured for a TCP/IP interface) or as a **PC-standalone** product (not connected to your existing blood bank system).

Network Integrated

As an **integrated** product, HemaTrax software works in the background of your standard blood bank information system. You simply input or select the unit-specific information you need. HemaTrax automatically generates the full face label or any of the four quadrant combinations – all properly formatted, bar coded and ready to apply.

As a **PC-standalone** system, you enter the information that you need using our HemaTrax software.

## Features

System can be configured for PC-Standalone or TCP/IP interface

Password Protection – three levels of assignable security\*

Full menu of reports\*

Entire ICCBBA Product Database

Quick-Pik List\*

Bar Code Verification\*

User Defined Capabilities\*

\* Standalone Only

## Benefits

- Flexible enough to fit within your work process
- Your facility determines which employees have access to the system
- Provides you a complete audit trail to be fully ISBT 128 compliant
- Our technical group ensures that our database is always up to date to match ICCBBA requirements. You don't have to do any manual maintenance updates.
- Our Standalone version has a point and click product label print list so you have quick simple access to the main product labels you need
- Our standalone version includes software so you can verify as needed
- You can design and store R & D products as you need them

## About Digi-Trax -- Unparalleled Blood Labeling Expertise and Track Record

Digi-Trax has been providing blood banks and transfusion services with on-demand blood product labeling solutions since 1990. We pioneered the first FDA compliant ABO/RH and Expiration date on-demand CODABAR print solution. Our staff consulted on the ISBT-128 Task Force that developed the U.S. Consensus standard. We remain a continuing member of America's Technical Advisory Group (ATAG) that manages the ISBT specification. Our labeling systems are in use at most of the nation's major blood banks as well as all U.S military blood donation centers. Digi-Trax is a registered ICCBBA software developer and AABB member.
