

"Digi-Trax pioneered the use of on-demand printing in blood banks. We developed the first standalone CODABAR FDA compliant ABO print systems for the US department of defense in 1990. Digi-Trax has gone on to develop both complete CODABAR and ISBT-128 interface systems, now connected with all major blood bank systems." -Richard Kriozere, CEO Digi-Trax Corp.

HemaTrax® from Digi-Trax®

Blood Labeling Solution

Meet ISBT 128 blood labeling compliance quickly and simply
