

MAXIMIZES BUDGETS. MINIMIZES WASTE.

Zebra bar code printers and antimicrobial wristbands make it easy for your hospital to ensure patient safety while making the most of its budgets. With fewer supplies and maintenance needs, Zebra thermal print solutions offer a lower total cost of ownership than many other wristband print solutions. Zebra thermal printers and wristbands also produce long-lasting, smudge-proof bar codes — so staff members won't need to reprint them during a patient's stay. And because Zebra printers produce individual wristbands on demand, there are no wasted excess labels or bands. Zebra even partners with leading GPOs to extend your purchasing power.
