

## **HemaTrax TB**

### **3.3.0 Release Notes**

#### **General Changes**

- Added two new format sets. Cryo Label and Processing Label. Selectable from the Select Label Drop down.
- Print log is now searchable by DIN. Enter part of all of DIN in search field to display search results.
- Cryopreservation and Expiration Date is now selectable either by entering the month/day/year or selecting it from the calendar.
- Removed clearing of patient data after a print job. Data will now remain after printing.
- Remove option to disable pack code incrementing.
