HemaTrax®
Your complete system for ISBT 128 compliance labeling

The solution to your blood products compliance labeling needs

HemaTrax®, an on-demand labeling system from Digi-Trax®, includes our industry-leading labeling software, a Zebra® thermal printer, FDA compliant labels/supplies (meets CFR 21, Sec. 175.105) plus complete installation, technical service and support. Use HemaTrax to quickly and easily print the full range of ISBT 128 labels that meet the ICCBBA U.S. Consensus Standards.

Your choice of installation

Depending upon your work process, HemaTrax is available as a network integrated product (configured for a TCP/IP interface) or as a PC-standalone product (not connected to your existing blood bank system).

As a network integrated (product # HT-UNITY) product, HemaTrax software works in the background of your standard BECS (Blood Establishment Computer System). You simply input or select the unit-specific information you need. HemaTrax automatically generates the full face label or any of the four quadrant combinations – all properly formatted, for up to date compliance and ready to apply.

As a PC-standalone (product # HT-UNITY-SA) system, you enter the information that you need using our HemaTrax software. It’s the perfect solution in the event of emergencies, such as disasters like cyber attacks or other downtime situations. All you need to print labels is a backup printer. HemaTrax standalone software logs and records all activities for positive compliance.
Features of HemaTrax

Password Protection – three levels of assignable security
Your facility determines which employees have access to functions based on job level (available in the Standalone version only).

Full menu of reports
We provide a complete audit trail to be fully ISBT 128 compliant. Access to a log that includes all labels printed and/ or any changes made to the HemaTrax database (the log can be copied & pasted or saved to .pdf or .rtf) (available in the Standalone version only).

Entire ICCBBA Product Database
Our technical group ensures that your database is always up to date to conform to ICCBBA requirements. You don’t have to do any manual maintenance updates.

Quick-Pik List
Our Standalone version has a point and click product label print list so you have quick simple access to the main product labels you need.

Digi-Trax labels and supplies

Digi-Trax ISBT 128 labels and adhesives are designed to meet the rigorous demands required in blood banking, specifically FDA CFR 21, Section 175.105 and will remain wrinkle free, bar code readable and eye legible. Even when exposed to freezing temperatures, water bath, bleach disinfecting, abrasion and most other solvents.

HemaTrax ISBT 128 sample labeling at a glance

Donation Identification Number (DIN)

Single Quadrant ABO (2” x 2”)

Facility/ Product Label (2” x 3.25”)

Combination (4” x 2”)

Full Face Label (4” x 4”)
