

Mounting Solutions for Mobile Printers

Digi-Trax® is pleased to offer a variety of custom designed mounting solutions for several models of mobile printers. Our solution enables the mounting and charging of printers on any number of surfaces such as walls, desktops and mobile workstations used in healthcare facilities. Below are two of our standard mounts, but we're happy to customize a mount to meet your needs.

Key components of the solution are the printer-specific Mount Plate and docking mechanisms. Printers can be flush mounted or attached to pedestals for more flexible device positioning.

Mount for Zebra QLn220

Mount for Zebra ZD410

Digi-Trax remains dedicated to providing a full system solution to healthcare facilities—hardware, software, supplies, accessories, technical service and support. As a one-source stop, Digi-Trax offers solutions such as mounting products, designed to complement the full breadth of our offerings.

As a value added reseller, we will continue to develop system solutions to comprehensively meet the needs of our customers. For more information, please contact us below and find out how we can help you.
