Digi-Trax® Blank ISBT 128 Labels & Ribbons
For Z Series Zebra Tabletop Printers

ISBT-44-Z3
4” x 4” thermal transfer synthetic label
DIN in place, perforation between labels
950/roll
4 rolls per case
3,800 labels total
1 roll RR-110-6075 ribbon (4.33” x 1476’)

ISBT-44-PEEL-Z3
DIN in place, no perf for Zebra printers with peel option
4” x 4” thermal transfer label
950/roll
4 rolls per case
3,800 labels total
1 roll RR-110-6075 ribbon (4.33” x 1476’)

ISBT-44-SYRINGE-Z3
4” x 4” thermal transfer synthetic label
Note: ½” x 4” peel-off section for syringe on back side
DIN in place, perforation between labels
950/roll
4 rolls per case
3,800 labels total
1 roll RR-110-6075 ribbon (4.33” x 1476’)

ISBT-44-MULTI-Z3
4” x 4” thermal transfer synthetic label
Note: perforated in quadrants for use as 4 x 2 or 2 x 2
DIN in place, perforation between labels
950/roll
4 rolls per case
3,800 labels total
1 roll RR-110-6075 ribbon (4.33” x 1476’)

ISBT-44-REMOVED-Z3
4” x 4” thermal transfer synthetic label
Note: DIN cut out removed, perf between labels
DIN in place, perforation between labels
950/roll
4 rolls per case
3,800 labels total
1 roll RR 110 6075 ribbon (4.33” x 1476’)

ISBT-44-REMVD-PEEL-Z3
4” x 4” thermal transfer synthetic label
Note: DIN cut out removed, no perforation for Zebra printers with peel option
DIN in place, perforation between labels
950/roll, 4 rolls per case, 3,800 labels total
1 roll RR-110-6075 ribbon (4.33” x 1476’)

Work In Process Label
Temporary applications, direct thermal label, no ribbon required

WIP-44Y-Z3
4” x 4” blank direct thermal yellow label
Non-stock, contact us for delivery times
Digi-Trax® Blank ISBT 128 Labels & Ribbons
For Z Series Zebra Tabletop Printers

WBN-ISBT-Z3

3.74” x 4.5” thermal transfer synthetic label
500 per fanfold
6 fanfolds per case
3,000 labels total
1 roll R-18105389 ribbon (4.33” x 1476’)

Samples of Printed Labels, Additional Formats Available
Digi-Trax® ISBT 128 label specifications

Special care must be taken when applying to any frozen products since the recommended minimum application temperature from adhesive manufacturers is 35°F (1.6°C). Once properly applied to an acceptable surface, these labels will remain serviceable from 200°F (93°C) down to cryogenic temperatures starting at -65°F (-53°C) (these are the upper and lower temperature limits per the manufacturer). Testing each individual application is recommended.

Supplies are sold and shipped in “Cases” that have been designed for use with our certified Zebra Z-Series barcode label cellular therapy printers.

Each “Case” contains a matched quantity of labels and ribbons to eliminate waste.

The synthetic label material has been laboratory tested and matched with special resin ink ribbons to meet rigorous standards required as per the ISBT-128 compliant print specifications. It meets durable print standards set forth in the FDA Guidelines.

The adhesive coating meets FDA; CFR21, Sec. 175.105 requirements for direct and indirect bag applications.

The label and ribbon combination is designed to withstand freezing, water bath, bleach disinfecting and repeated abrasion and will not wrinkle, shred, or smudge. The durable thermal transfer ink image printing will remain legible under these harsh conditions.

All Digi-Trax® thermal transfer labels feature high initial tack and ultimate adhesion. In addition, our adhesives offer good resistance to U.V., plasticizers and water.
