HemaTrax® Standalone
The Perfect Safeguard for Backup and Emergency Use

HemaTrax® is the industry leading blood labeling software for printing of ISBT 128 labels. This software is used with a desktop or table top thermal printer. You can be assured that our labels are FDA compliant and meet all ICCBBA consensus requirements.

The software enables you to print 4" x 4" face labels, product labels and more. Installed in thousands of blood banks and transfusion services departments worldwide, HemaTrax® is the way to go for ISBT 128 blood labeling.

Emergency Backup Label Printing System

HemaTrax® standalone is most often used for backup and emergency use, and it can also be used by smaller facility that only needs to print a small to moderate number of labels. If your hospital system's network goes down for any reason, due to power outages, cyber attacks or even natural disaster, this standalone system will print your ISBT 128 labels easily and quickly.

Feature Rich Label Printing Software

The software includes the entire **ICCBBA product database** and is updated quite frequently* to maintain accuracy. There is no need for manual maintenance updates.*

*A subscription to the Digi-Trax® LSS Program is required for HemaTrax® product code updates.

Our standalone system has a point and click— known as **Quik-Pik product label print list** so that you have immediate and easy access to previously entered labels. The database stores labels so there no need to re-enter information.

Print comprehensive reports that detail who printed which labels at what time; thereby providing you with a complete audit trail. You can also save these reports for future use.

Maintain internal security via configurable password protection

If you have **special products** that require labels, you can design and store these R&D formats as you need them.

HemaTrax® Standalone

Additionally, our HemaTrax® **LSS software update program** ensures you have the latest product codes and software updates. You can be sure you are ICCBBA compliant.

Our **technical support staff** at Digi-Trax are here to support you every step of the way through installation and setup and for all future support.

Digi-Trax® labels and supplies

Digi-Trax® ISBT 128 labels and adhesives are designed to meet the rigorous demands required in blood banking, specifically FDA CFR 21, Section 175.105 and will remain wrinkle free, bar code readable and eye legible. Even when exposed to freezing temperatures, water bath, bleach disinfecting, abrasion and most other solvents.
Scanners and Printers for HemaTrax®

Depending on your printing volume and needs, HemaTrax® is compatible with healthcare bar code scanners and either a desktop or tabletop printer:

Desktop — Low volume facilities
**Tabletop** — Medium to high volume facilities
Digi-Trax® Firmware

Digi-Trax® label printers include unique, specialized firmware that meets ISBT 128 bar code labeling requirements.
