

# SATO SoftTouch Wristbands

## Enhanced Safety Through Positive Identification

**SATO SoftTouch Wristbands** provide patient comfort with a soft feel and improved flexibility. These highly durable wristbands provide critical patient information at the point of care and improve HIPAA security compliance. Comfortable, durable, SATO SoftTouch wristbands remain legible after exposure to water, abrasion, cleaners and everyday wear.

Use of the wristbands provide **enhanced safety** through positive identification of each individual patient. Medical and account number of each patient can be linked by human-readable text, barcodes and if needed the patient's picture. All without the need of thermal transfer ribbons which are cumbersome, increase costs, and are under HIPAA guidelines require expensive destruction procedures.

### FEATURES
